WORK EXPERIENCE

Solutions Engineer

Deloitte Consulting

June 2021 - current / Boston, MA

- Coded programs and websites for Deloitte Consulting clients
- Employed technologies such as Java, AngularJS, and other languages per the clients' needs to build solutions to meet their goals

Sales Associate

Papyrus

July 2019 - August 2019 / Cambridge, MA

- Sold products while harnessing the art of marketing to arrange products in meaningful ways and boost sales
- Gained hands-on experience with navigating around diverse clients, working in teams, and documenting financial transactions

PROJECTS

PrePop

Spring 2021

- Collaborated with fellow undergraduates to create a dashboard that informs building staff if a room is violating COVID-19 occupancy rules
- Utilized React and a pretrained TensorFlow ML model to build a website that counts and reports occupancy levels of building rooms via camera feeds

Data Sora

Summer 2020

- Built a bot that posts video game information to chat servers on Discord
- Used Python, BeautifulSoup, and other libraries to automatically scrape and style content from websites and check for updates from the websites hourly

KHUχ Info Page

Spring 2020

- Created a web app that visualizes data and resources from the game Kingdom Hearts Uχ
- Integrated HTML and JavaScript to make a responsive webpage that allows users to search, sort, and filter across 2,000 adventurers
- Garnered over 26,500 unique users and 62,300 session visits
